Applicants' election of Group 1 (claims 1-12, 21) is acknowledged. Also acknowledged is applicants' initial attempt to comply with the "election of species" requirement.

Applicants have elected a compound *per se* (as opposed to a composition as in claim 21). As for the specific compound, applicants have elected any peptide "having" the sequence of SEQ ID NO:3. SEQ ID NO:3, in turn, is a peptide of the sequence DIREK, wherein the epsilon-amino group of lysine is bonded to the side chain carboxyl group of aspartic acid. However, the term "having" can be interpreted as open-ended language. Accordingly, further clarification is sought with regard to the elected specie.

Applicants are required under 35 U.S.C. §121 to elect a disclosed specie (in accordance with the following) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (the lettering begins with "d" to avoid conflict with the earlier lettering system):

d) one of the following: (i) the elected compound consists of the sequence DIREK wherein the *epsilon*-amino group of lysine is bonded to the side chain carboxyl group of aspartic acid; or (ii) the elected compound is one in which a substituent or moiety is covalently bonded to the (cyclized) peptide DIREK (wherein the *epsilon*-amino group of lysine is bonded to the side chain carboxyl group of aspartic acid);

e) in the event that the elected compound is one in which a substituent or moiety is covalently bonded to the (cyclized) peptide DIREK (wherein the *epsilon*-amino group of lysine is bonded to the side chain carboxyl group of aspartic acid), election is required of a specific and fully defined compound, with all amino acids accounted for, and indeed, all atoms accounted for.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.
